Art Unit: 3653

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 through 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Geschwindner et al in view of Klenk et al.

Geschwindner et al teach everything except a sheet separating device comprising a belt-like blade movable over an entire width of the stacked sheets in a direction orthogonal to a moving direction of the shutter bar.

Klenk et al teach a sheet separating device comprising a belt-like blade 1 movable over an entire width of the stacked sheets in a direction orthogonal to the moving direction of the sheets and to a shutter bar 4. See Figures 1 and 2.

Klenk et al teach providing such a separating device to form a gap in the stack to aid in the insertion of the shutter bar. See column 5 lines 10-25.

In view of the teachings of Klenk et al, it would have been obvious to one of ordinary skill in the art to provide the apparatus of Geschwindner et al with a separating device comprising a belt-like blade to form a gap for the insertion of the shutter bar employed by Geschwindner et al.
